EDUCATION

DePaul University

Chicago, IL

B.S. in Mathematics and Computer Science; GPA: 3.8/4.0

Expected Jul 2027

- **Coursework:** Data Structures & Algorithms, Computer Systems, Computer Networks, Programming Languages

EXPERIENCE

Quantum Metric

Remote

Software Engineering Intern

Jun 2026 – Present

- Owned **AI Brand Discovery**, a GenAI feature deriving survey branding from PDFs and websites, from pre-GA design to production launch across a React/TypeScript frontend, Go backend, and a new browser-rendering service.
- Built a **Go + Gemini 2.5 Flash / Vertex AI** pipeline with schema-constrained output and prompt-injection defenses; grounded colors in measured palettes with WCAG contrast checks to prevent hallucination.
- Built a **Cloud Run + Playwright** service for untrusted URLs; wrote Terraform for Direct VPC egress, Cloud NAT, OIDC auth, and deny-private-range firewall; SSRF-hardened by DNS pinning and redirect revalidation.
- Built **Go** workers with **Redis-backed** async orchestration, rate limiting, stale-job recovery, failure-aware retries, graceful shutdown draining, and cold-start egress validation; warm end-to-end renders complete in ~2–3s.

Renaro

Chicago, IL

Founder & Sole Engineer | renaroapp.com

Mar 2026 – Present

- Built and shipped a **multi-tenant dispatch SaaS** for taxi and limo fleets covering dispatch, payments, driver operations, messaging, and analytics; secured \$3K+ in pre-launch revenue and prepared an operator pilot.
- Hardened **WebSockets** against a 10K-client reconnect storm (124 to 4,543 authenticated connections) and replaced per-tenant polling with a **SKIP LOCKED** batch claim, restoring 97% event delivery at simulated 3K-tenant load.
- Built **Stripe Connect** payments (ACH, disputes, refunds, payout holds, metered billing) on idempotent, webhook-deduplicated, compare-and-swap money paths.
- Enforced tenant isolation with forced **PostgreSQL row-level security** on every tenant table and CI schema gates; validated with an adversarial suite covering cross-tenant access and payment IDOR.

BrunoSoft

Remote

Software Engineering Intern

Oct 2025 – May 2026

- Migrated **100+ AngularJS components** to modern Angular with lazy-loaded routing and modular state management, cutting production bundle size 30% and build time 40%; added unit and integration tests.
- Containerized dev and prod environments with **Docker Compose**, cutting setup from 2+ hours to 15 minutes.

American Coach Limousine

Downers Grove, IL

Systems Integration Specialist

Jul 2022 – Feb 2024

- Integrated the **FastTrak** booking API with internal dispatch via REST: 50+ affiliates, 3,000+ weekly bookings.

PROJECTS

Styleum | *SwiftUI, TypeScript, Hono, Gemini, Computer Vision* | styleum.xyz

Dec 2025 – Present

- Built and launched an AI-powered iOS wardrobe app as sole engineer in 8 weeks, reaching 100+ users; designed a five-stage vision/LLM pipeline and reduced generation cost to ~\$0.002 per outfit.

HazardLens | *Python, YOLO26, OpenCV, FastAPI, React* | [GitHub](#) | [Video Demo](#)

Feb 2026

- Built a real-time construction-safety pipeline processing video at 15+ FPS with multi-class PPE detection, centroid tracking across frames, temporal zone-violation and near-miss detection, and severity-scored live alerts.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL, Java, Swift, C++

Backend & Data: Node.js, Fastify, PostgreSQL, Drizzle, pg-boss, Redis, REST, WebSockets, Stripe Connect, WorkOS

Frontend & Mobile: React, Next.js, Angular, React Native, Expo, SwiftUI, Playwright

Cloud & Infra: GCP (Cloud Run, Vertex AI), AWS, Terraform, Docker, Cloudflare, Vercel, CI/CD, GitHub Actions

AI & CV: Gemini, LLM APIs (OpenAI, Anthropic), PyTorch, OpenCV, YOLO, BiRefNet, Florence-2, FashionSigLIP
